

Web Driven Time, Expense, Billing,
Payment, and Project Management
NEW: Accounting System and
QuickBooks Integration

“Track time and expenses with ease.”

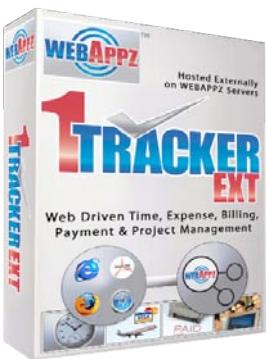

“Expedite your billing process.
No more missed billings.”

“Reduce administration costs.
Streamline your workflow.”

“Real-time overview of your
office activities.”

1TRACKER is a concise point solution specifically designed to address everyday time and expense management issues of small to large businesses in the professional services sector. It is a user friendly, 100% web based, enterprise-class solution capable of handling all your company's demanding time, project, and expense tracking, billing and payment management issues. From simplified data entry to sophisticated reporting, 1TRACKER has the flexibility to meet the different business needs of companies, today. It is easily scalable, supporting few to many users, without compromising on performance, reliability and security.

1TRACKER EXT

Looking for a better way to keep track of time and expenses? Want to simplify data entry, improve workflow, expedite the billing process, and manage payments? Then 1TRACKER is the answer.

The ideal time and expense tracking, billing, and payment management solution for small to medium sized companies.

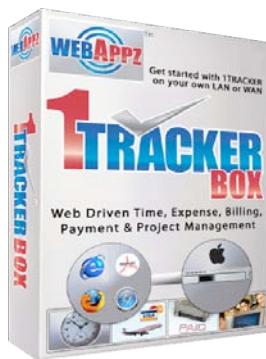

A 100% web based application, with 24/7 secure, universal access, high bandwidth infrastructure, scalable, reliable Sybase database, and daily back-up service.

No software to install, no maintenance issues, and free upgrades make 1TRACKER EXT the perfect solution for companies that don't have an IT department.

Hosted securely by WEBAPPZ, on powerful servers, and behind CISCO firewalls to ensure a secure online environment and data security.

With flexible subscription options available, and a free trial option, there's no better time than now to try 1TRACKER EXT.

1TRACKER BOX

Interested in a time and expense tracking, billing and payment management solution you can manage in-house? Then 1TRACKER BOX is for you.

Get a web based solution including all of the features we provide in 1TRACKER EXT, except run it on your company's own LAN or WAN.

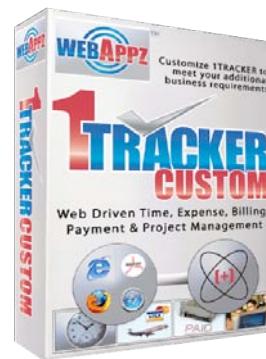

1TRACKER BOX is a ready-to-use configured box, with all the software pre-installed and pre-configured with your database of choice.

Whether you are a small, medium, or large company, getting started with 1TRACKER BOX is easy.

Improve your time and expense tracking, create professional real-time invoices, easily manage payments, and generate detailed reports for your workers, projects, clients, and entire office.

If your company is looking for a flexible, scalable, low maintenance solution, you should consider 1TRACKER BOX.

1TRACKER CUSTOM

Interested in our 1TRACKER BOX solution but need some other features added or wish to install it on your own company's server? Then, you're looking at 1TRACKER CUSTOM.

1TRACKER's sophisticated but flexible database design makes customization fast and easy. Whether you are looking to integrate 1TRACKER with your current systems, or wanting some additional functionality, our consultants have the expertise to meet your business needs.

When you consider what it would take to design a fully customized solution for your business, think of all the time, money, and resources you will save with our 1TRACKER customized approach. Get a tailored solution in little time without compromising on the functionality and quality that 1TRACKER has to offer.

Features

Web Based - 100% web based. Access and work with real-time data from anywhere, anytime. All you need is a web browser, no additional software and hardware installation required.

User Friendly Interface - Easy to use, organized interface with graphical icons to ensure smooth navigation.

Secure Access - Sophisticated proprietary firewall, advanced login and password management policies, and business-defined application security groups ensure authorized and secure access.

Network Security - Industry standard SSL 128-bit encryption and third party network security measures to ensure maximum security.

PDF Printing - Dynamic PDF printing enables you to print real-time professional reports from any location having access to an internet browser.

Reports - Select from timesheets, statusreports, and expensereports to project, client, billing and payment reports, and more.

Real-time Reporting - Electronic real-time data entry, reporting, and updating provides for enhanced visibility of projects, between managers, employees, and clients.

Track Time - Keep track of time to the last second with automatic timekeepers. Eliminate data entry errors with the auto calculation feature, and ensure timely submission and quick approval of timesheets.

Track Expenses - Facilitated expense tracking, support for multi-currencies, buy/sell exchange rates feature, overhead margins, and fixed per unit costs give you the flexibility to handle all project related expenses.

Streamlined Approval Flow - Automated sequential approval flow, integrated approval and feedback notifications, and facilitated mass approvals add convenience and speed to handle all project-related expenses.

Payment Tracking - Track, monitor and manage all your payment related issues from payments to interest charges to returned cheques.

Client Billing - Generate invoices to capture timesheets, expensereports, fixed project fees, discounts, and local taxes.

Multiple Currency and Tax Support - Support for multiple currencies in fees, expenses, products, client billing, and payments. Support for different tax structures, eg. GST, PST, HST.

Compound Timesheets - Get a consolidated period-specific view of all your timesheets, for one or more clients, projects and workers.

Population and Rate Sets Matrix - Assign workers to projects and specify individual billing rates.

Scheduling - Manage, forecast and allocate your company's resources effectively.

Customization - Administrative to user level customization, including password management, defining office worktypes, expensetypes, base currency, local taxes, currency exchange rates, selecting date and number formats, personal user interface style, and more.

Online Help - Complete online page-specific help documentation enables users to find information quickly and easily.

History - Period or date range-specific archives of company's activities and reports, for quick and easy reference.

Scalability - Easily scalable from few to millions of users without any performance inefficiencies.

Integration - Flexible relational database design facilitates any client-specific customization. Integrated export feature for all lists.

And more...
